# Features

## Xsens

Wellness tanning for all the senses. Whenever a pleasant atmosphere in the tanning tunnel is desired, Xsens will distribute a wonderful scent throughout the interior of the Luxura. It's like a breath of fresh air in the fragrances Ocean, Blossom or Sandalwood. For X<sub>10</sub>, X<sub>7</sub> and X<sub>5</sub> you can choose between Xsens I (one fragrance for your Luxura) and Xsens III (all three fragrances are available).

## Qsens

Naturally refreshing. A wonderful, gentle mist is sprayed across the body at intervals.

## SLi+

This facial tanner, with a single socket mounting, has a specially developed tanner-reflector combination, which ensures first-class tanning results (for X<sub>10</sub> only).

## BPS

Balanced Power System: a special filter for the SLi facial tanner. For more efficiency, direct pigmentation, and a visual mirror effect. Especially developed for EU-type III and Q,3.

## HPS

High Power System: a special filter for the SLi facial tanner. For more efficiency, direct pigmentation, and a visual mirror effect.

## IPS

Immediate Power System: a special filter for the SLi facial tanner with the most optimal high immediate pigmentation, and an elegant visual mirror effect. Developed for use within 0,3W/m<sup>2</sup>.

## Ambient FlowLight

The fading colour flow with a nearly inexhaustible range of colours provides an extra sense of atmosphere.

## Lift

This positioning extra ensures an optimum tanning performance because it will locate small and medium-sized users correctly to the tubes. Therefore, both the face and the feet will be perfectly positioned during the tanning session (for V<sub>10</sub> only)

## IP Control

This Intelligent Power Control system guarantees the optimal UV exposure of 0.3 W/m<sup>2</sup>, as prescribed by EU regulations, throughout the entire lifespan of the lamps. IP Control extends the lifespan of the lamps and ensures consistently optimum output throughout the entire life cycle. Besides that the new IP Control 2 system makes it possible to control each lamp individually, so lamps which are farther from the body are supplied with more power to compensate for the distance. This ensures that every part of the body receives the same 0.3 W/m<sup>2</sup> of UV exposure. Moreover, this results in energy savings of up to 25% for operation of the lamps.

## Bluetooth

The smart Bluetooth system allows tanners to easily connect their own smartphone or small tablet to the sound system for great audio experiences. This way they can instantly play their own music while tanning. No cables needed - simply play & tan.

# Features

## SoundAround Plus

In addition to SoundAround Basic SoundAround Plus includes Bluetooth, SD cards for two more internal music channels (relax music, energetic music or program your own music). SoundAround Plus for V<sub>10</sub> is excluding Bluetooth.

## SmartVoice

A friendly voice will guide the user/acoustically through the different functions. It will describe all possibilities, turning the tanning session into a vertable miniature holiday.

## My MP3

The guest can log in his or her MP3 player/smartphone/small tablet and experience an individual sound, in addition to the four optional music channels from the SoundAround package.

## Eco power

The electronic ballasts - integrated as standard - ensure energy savings of at least 25% (for X<sub>3</sub>) and 15% (for V<sub>6</sub> & V<sub>8</sub>).

## ContourPlus

More comfort thanks to the ergonomically moulded lying area which is ideally adapted to the body contours.

## Shoulder tanner +

The shoulder tanning unit at the head end of the VEGAZ tanning tunnel, ensures perfect performance for this area of the body and is supplemented by another visual and functional highlight: the neck reflector area.

## Airco

Air conditioning system for cooling the ergonomically moulded lying area, body and face. The users can switch this on and off as they choose.

## Climate Control

Climate Control allows you to set your preferred temperature, which then remains constant throughout the tanning session.

## UV-LED tanning booster

Unique face tanner that combines UV light with LED technology. This LED technology boosts the UV light spectrum for strong direct pigmentation and combines it with red 630nm LEDs to achieve a superior, intense and evenly tan with a touch of skin care. Embedded in a unique reflector housing, the LED light is distributed completely evenly and optimally throughout the facial area.

## MyLuxura portal

This online communication interface allows you to communicate with your Luxura sunbed remotely. Alongside software updates, the MyLuxura Online-Portal makes a great deal of data available within a secure log-in area - invaluable for service questions, problem-free operation or use analysis. All significant information is clearly presented here and can be downloaded immediately from anywhere for unit diagnosis. Access can be either online through the internet, or directly using a local WLAN.

## Notes:

## Notes:

European Sunlight Association

#### **Sunny certainty**

A choice for Luxura sunbeds is a choice for certainty. All the appliances meet the most stringent safety regulations and have the CE and/or KEMA quality marks. Moreover, the appliances are carefully developed in accordance with the latest standards for tanning equipment. There's no better way to ensure responsible tanning!
